

Chopped strand PP7

Excellent hot water resistance and detergent resistance

Product description:

PP7 chopped strands are made from E-glass and have excellent hot water and detergent resistance properties. Due to its characteristic features, it is easily fed into the extruder and provides high mechanical strength with Polypropylene (PP) resin in the composite part.

Features and benefits:

- Manufacturing in accordance with ISO 9001:2015 conditions
- High integrity with good fiber dispersion
- Excellent flow characteristics and excellent bulk density
- Good processing
- Excellent hot water resistance and detergent resistance
- Very low fuzz
- High mechanical properties

Product specifications:

Glass type	E	Sizing content (%)	0.70 ± 0.20
Fiber diameter (μ)	Nom. 13	Flowability	Very good
Moisture content (%)	max. 0.07	Resin compatibility	Polypropylene, Polyethylene
Sizing type	Silane	Fiber length (mm)	4.5 / 6

End-use markets:

-  Thermoplastic composites
-  White appliances
-  Automotive

Packing information:

Packaging	Big-bag
Pallet dimensions (cm)	114 x 114
Pallet height (cm)	120
Pallet net weight (kg)	1000 / 1100

Please scan the QR code for more detailed packaging information.

Storage conditions:

Product should be stored in dry area at room temperature and relative humidity of approx 65%. Product should be conditioned for 24 hours in the work area prior to use. In case of partial usage, package should be re-sealed.

Form No: EN-3141-1 Revision Date: 09.2024
